Dear parents and carers

YEAR 12 MATHEMATICS - CALCULATOR

As your child embarks upon the journey of A level mathematics it is important that they have the correct equipment to support them. In the mathematics department we recommend the following calculators.

For A level mathematics and further mathematics –

fx-991CW advanced scientific calculator (RRP £35.99)

The fx-CG50 graphic calculator: (RRP £139.99) is useful for both courses but is expensive.

These calculators are available online or in a range of high street retailers (Amazon currently have the fx-991CW available for £22.15, and also Asda have them available for £12.50 but I am unsure how long this offer will last.)

We can place a school order for calculators directly from Casio and can get calculators at the following prices:-

fx-CG50 graphic calculator £70.50

fx-991CW advanced scientific calculator £21.50

If you would like to order a calculator through school we will be placing the order on Monday 16 September.

Students are reminded that they can apply to the discretionary bursary scheme, even for small amounts. Students should speak to Mrs Jo Leeper in the sixth form office for more information.

If you could please return the slip below to Mr Graham via the post boxes and make payment using ParentPay.

Yours faithfully

Mr C Graham
